65 PAGES, CAP QUARTO, PAPER.
\$1.05, Postpaid.

To avoid mistakes and possible misunderstandings (which have not infrequently occurred), I would call attention to the importance of bidders carefully revising their bids before sending. It sometimes happens that failure to do this results not only in losing a desired lot, but in the purchase of another which the bidder is not interested in and does not want. Please bear this in mind.

Please make remittances by Money or Express Order, or Bank Exchange on New York. It is an expense to me to collect out-of-town checks.

* * All manner of copies, alterations and impositions are excluded from my sales.

* * There are no duplicates in any lot unless so mentioned specially or stated to be unassorted.

* * Copies of this Catalogue, giving prices realized, neatly executed in red ink, 40 cents.

TO BID UNDERSTANDINGLY, THIS MUST BE READ CAREFULLY.

Coins and medals are sold at so much per piece, U. S. proof sets excepted. You cannot bid for *one piece* in a lot. If a lot contains ten pieces, and you desire to offer \$2 for it, make your bid 20c. The auctioneer will accept an advance of 1 cent up to 50c., then 5c. up to \$2.50, when 10c. is the limit, up to \$10, and thereafter not less than 25c. Hence any bid up to 50c. can be entertained, but after that the bid must be 55c., 60c., and so on. Such offers as 53c., \$1.01, and all intermediate figures are unavailable.

My terms for buying are 10%, and I make no charge less than 25 cents.

TERMS USED TO DEFINE THE VARIOUS PARTS OF A COIN.

The front or face of a coin bearing the principal device, is called the obverse. *Obv.*

The back is called the reverse. *Rev.*

The principal device or object represented on a coin is called the type.

The area or space between the type and the circumference is called the field.

The lower portion of the area of a coin beneath the type, and separated from the rest of the field by a horizontal line, is called the exergue. *Ex.* The line itself is sometimes called the socle.

Small objects represented either in the field or the exergue, as adjuncts to the main type, are called symbols.

Portions of a coin which are sunk below the level of the surface are said to be incuse.

The words *surrounding* the device form the legend; if arranged to read in lines *across* a coin or medal, they are called the inscription.

IMPOSITIONS.

Counterfeits are of three classes: (1) Struck copies from dies imitating the original. (2) Electrotypes. (3) Casts (the moulding process). An altered date on a piece, otherwise genuine, may properly be also classed with the preceding.

Restrikes are impressions from the original dies, but struck subsequently; and although from such original dies, should not be classed with *original issues*: in certain well-known cases, they have been furtively put on the market, to the detriment of owners of rare originals, and with a willful disregard of their rights, which might almost be called robbery, since the owners, even if conscious, are helpless. Restrikes are close relations to the foregoing class, and should not be encouraged. Medals struck at the Paris mint since 1842 have the name of the metal inscribed on the edge, often with a symbol by which the date of restrike can be approximately known. Therefore issues subsequent to that date are easily determined, whether original or modern.

A CATALOGUE of this sale, with prices realized, marked in red ink, will be mailed for 40c., prepaid.

A study of the prices at which coins and medals are selling cannot fail to make bidding more satisfactory. The cost is but a trifle, and a knowledge is thus rapidly acquired by comparison of the different sales, enabling the bidder to make offers which will enhance his chance of obtaining what is desired.
